#### Wednesday Night Dinner Rides:

Our winter schedule is on.

Meet at the restaurant at 6:00 p.m.

Every 2nd & 4th Wednesday meet at Christo's 6:00 pm

**Ed & Linda Feldt**

# Directors Notes

**Well Spring keeps peaking it's head around the corner. She is just a tease. Spring will get here ,we just have to be patient. While we wait, we have a few things, we can do to prepare for her arrival. Winter Rendezvous is at the end of the month and it looks like a lot of fun. It is being held in Shipshewana home of Amish food. Wing Ding is being held in Nashville, Tn. this year, close enough to feel the breeze from the passing wings. We will be planning a few rides for the summer season.**

**Here is a list of some locations that were mentioned. Please feel free to add to the list, if you have a place ,you would like to ride to.**

**Day rides:**

**Cammack Station**

**Studebaker Museum**

**Garfield Trail**

**Johnny Appleseed home**

**Overnight rides:**

**Gasthof House Montgomery, In.**

**Log Inn**

**Milan Basketball museum**

**Lincoln Jamboree**

**We are looking for locations and leaders, if you feel the need, the need for the lead.**

**See you at the next dinner ride or meeting or both.**

**Ed & Linda Feldt Chapter Director**

# Rider Education

**-15 Frick'n degrees! Are you kidding me?!?!?!?!?!? I try to ride all year but that's just too darn cold! So I get to walk by my bike on the way to the car to go to work. Not the way I like to start my day. Talk about depressing! sigh**

**Well there are things we can do as we impatiently wait for the thaw. One of the things is to check out our gear. The last thing we want is to get a nice day only to find out our gear shrunk over the winter! Let's start from the top and work down.**

**Helmet – Check it for visible signs of damage. It doesn't take much of a hit to compromise the integrity of the impact absorbing material. Check the manufacture date. Manufacturer's recommend replacing their helmets every 5 or so years because the impact foam starts to break down. Do a clarity check on your visor and clean/replace as necessary. Give your helmet liner a good sniff test and give it a wash if your eyes start to water!**

**Jacket – Make sure it still fits! Check the armor for signs of breakdown. Make sure all the zippers, snaps, and Velcro are in good shape. Give it a wash to make sure the reflective materials can be seen. Make sure it's not ripped or torn.**

**Gloves – Make sure your fingers aren't popping through and are completely covered. Make sure they're tight enough to stay on during a get off. Check them for cracking and getting thin. Make sure they're still comfortable and you can work all the controls.**

**Pants – Make sure your riding pants can still be buttoned and zipped up! If you have riding pants, make sure the armor is still good. Check them for cracking and getting thin. Make sure they're still comfortable and you can work all the foot controls.**

**Boots – Check the soles for wear and cracking. Same for the uppers. It's a good time to re-apply water proofing and put a coat of polish on them for protection. Make sure they still fit so you can ride all day in comfort.**

**Rain Gear – Now's a good time to pull it out to get some air. You can also check for rips/tears and make sure it still fits. Better to find out now before you need it!**

**If you get your gear all cleaned up, checked out, or replaced you'll be all set for that first warm day (at least double digit temps!) to get our bikes out and hit the road!**

**Until next time.....**
